

Guardian Traffic Services (Regina and Saskatoon, SK)

George Jakeman, General Manager

When our company began operating in Regina in April 1985, we focused on the rental of barricades and traffic control devices, as well as the sale of products relating to the safe movement of traffic for work zones and permanent applications. In 1988, we opened our Saskatoon branch facility and, through it, we provided manufacturing and rentals of traffic and safety signs to the central and northern areas of Saskatchewan. Along with supplying rental products, we were the first branch to provide a certified work zone set-up service that included installation, placement, and maintenance of the devices within the work zone. This service is now an integral part of our rental operations.

Our success has been achieved through our commitment to customer service, our development of safety initiatives, and our dedication to supplying quality products to the industry. Thank you for considering Guardian Traffic Services for your traffic control needs.

Guardian Traffic Services provides traffic and safety sign manufacturing and rental services, including certified work zone set-up, to the central and northern areas of Saskatchewan through its Regina and Saskatoon offices.
